

# Resource & Production Planner

Do you want to contribute to the energy transition? Sif Group is looking for a Resource & Production Planner for its Rotterdam Maasvlakte location. Here's what you'll be doing: As a Resource & Production Planner, you'll support the Manager Production at the Rotterdam Maasvlakte location in achieving optimal production processes, focusing primarily on themes that transcend different areas of interest, such as production setup, capacity, efficiency, and process optimizations. You'll assess improvement proposals from various areas of interest holistically, playing an analytical and advisory role. You'll act as a liaison between different areas of interest in Production and PT&I, Operations Office, and you'll also be responsible for resource planning (people and machines) for the entire production.

You'll be part of Sif, a pioneer in offshore foundations with 75 years of experience, technical expertise, and the daily dedication of our professionals. Sif has established a leading position in the supply chain for offshore wind farms. In this role, your expertise will directly impact how Sif monitors its production processes. Sif is an outstanding company with strong growth ambitions, a place of craftsmanship where there's ample room to showcase your entrepreneurship and continue your development. At Sif, you'll have a direct impact on the energy transition, contributing to a greener world.

The Operations Management, Coordination, and Production department is responsible for producing complete monopiles or semi-finished products for offshore foundations for wind turbines and oil and gas platforms. Hulls are rolled from large plates, which are then welded together through machining and milling to form sections, and these sections are assembled into monopiles (steel foundations). It's a single-piece production as each monopile has unique dimensions.

Who are you? You'll translate the production planning from Operations Office into detailed planning regarding required disciplines, resources, machinery, and number of employees. You'll advise on operationalizing improvements in processes, required machinery, resources, and production setup. You'll analyze, assess, verify, and advise on changes and optimizations for feasibility and achievability. You'll assess the required number of employees and ensure timely availability of necessary capacity in coordination with HR. You'll collaborate with Managers within the disciplines regarding the flexible deployment of employees based on the plan and ad hoc situations.

Moreover, you have:

- A Bachelor's degree, supplemented with technical knowledge;
- Knowledge of welding techniques and (large) steel constructions;
- VCA-VOL certification;
- Knowledge of production processes and improvement methodologies (such as lean);
- Knowledge of internal processes and procedures;
- Proficiency in the English language.

What does Sif offer you?

- A salary ranging from €3,415 to €5,166 gross per month
- A good pension scheme;
- 25 vacation days and 13 ADV days;
- Opportunities for education and training;
- A friendly team and a pleasant working environment;
- A place where you can continue to grow and develop;
- Impact on the energy transition and sustainability of the Netherlands and Europe.

Your development at Sif: With your application, you can become part of a wonderful company with strong growth ambitions. A place of craftsmanship where there's ample room to showcase your entrepreneurship and continue your development. At Sif, you'll have a direct impact on the energy transition and contribute to a greener world.
