

Welding Operator

Welding Operator at Sif

As a Welding Operator at Sif, you hold a crucial role in our production process, managing the machines and overseeing the welding of steel plates—some as long as 27 meters—into long plates that are eventually rolled into casings. Sif stands as one of the largest manufacturers of steel tubes (up to 2,000 tons) for offshore wind turbines. Within our close-knit and dedicated team, you have the opportunity to make a significant impact.

What will you do?

As a Welding Operator, your responsibilities include creating welding connections using semi-automatic welding machines, adhering meticulously to the relevant welding procedures (WPS). You are accountable for the proper setup and operation of the machines. Regular maintenance of production machines and other equipment is part of your duties to ensure optimal equipment functionality.

Ensuring the quality of the welded casings is a crucial task. You conduct checks and tests at the front end of production to ensure the program applies the correct operations. This ensures that the massive steel foundations meet required specifications and the highest quality standards.

Additionally, you report production data and maintain relevant documentation.

Safety is paramount in our production process. You ensure that all tasks are performed correctly according to regulations and guidelines, remaining vigilant for potential hazards and taking measures to minimize risks.

What does Sif offer you?

You will have an exciting and challenging role with a market leader in a rapidly growing and sustainable industry. There is ample room for development, and you will receive sufficient guidance—a place where your craftsmanship is valued.

- An excellent annual salary ranging from €36,100 to €46,700 based on a 40-hour workweek.
- You receive 25 vacation days and 13 ADV (reduction of working hours) days.
- Your pension is well-managed through the Pension Fund for Metal and Technology, with Sif contributing 78%.
- You receive €0.23 per kilometer for travel expenses.
- A warm working atmosphere within a team of dedicated colleagues, always up for a good laugh.
- Sif has been in existence for over 75 years—a stable, growing organization with room for ambition and initiative.
- You'll feel welcome, with an extensive onboarding process.
- The opportunity to contribute to the energy transition and a more sustainable world.

Who are you?

- You have a passion for metal, with welding experience being a plus.
- Possession of a valid VCA Basic certificate in English or Dutch, or willing to obtain one.
- Proficiency in operating an overhead crane is an advantage.
- Responsible with attention to detail.
- Willing to work in our 3-shift system.
- Start per beginning of week 43, 45 and 47.

Who are we?

Sif, founded in 1948, is a Dutch company that has become a leader in its industry, supplying steel monopile tubes for offshore wind parks. Wind energy is the future, and we pursue this with 600 professionals from two production locations in the Netherlands: Roermond and the Tweede Maasvlakte in Rotterdam. Since May 2016, Sif has been listed on the stock exchange.

Our company culture is based on collaboration, quality, and a commitment to safety. You'll be part of a passionate team determined to accelerate the energy transition.

Is this your new challenge?

As a Welding Operator at Sif, you can play a key role in our production process and the energy transition. Do you have the experience and skills we're looking for? Do you want to be part of our enthusiastic team? Apply today and contribute to a more sustainable future at Sif. Together, we make an impact!
