

Welding process Specialist

"Do you want to make a difference in the energy transition and do you have a passion for welding? Sif Group is looking for a specialist who will help us with technical issues related to welding processes and contribute to the growth and development of our company!

What will you be doing?

As a welding process specialist at Sif, you will be responsible for training and guiding welders and overseeing welding processes during production.

You will be the point of contact for welders regarding welding-related issues. You will identify and assist the welding bureau in analyzing trends in welding repairs and determining possible causes. You will perform new welding method qualifications (PQR). Participate in improvement teams. You will provide functional guidance to welders and oversee the delivered welding quality. Conducting machine audits.

Where will you be working?

Sif is a pioneer in offshore foundations, with 75 years of experience, technical expertise, and the daily commitment of our professionals, placing Sif in a leading position in the supply chain for offshore wind farms. In this role, your expertise will directly impact how Sif monitors its welding processes. Sif is an excellent company with strong growth ambitions, offering a place of craftsmanship where there is ample room to showcase your entrepreneurship and continue your personal development. At Sif, you have a direct impact on the energy transition and contribute to a greener world.

As a welding process specialist, you will join a team that includes fellow welding process specialists, the welding coordinator, safety officials, customer inspectors, as well as colleagues from operations and maintenance.

Your responsibilities:

You contribute to the development of new welding methods with colleagues from the welding department. Ensure the correct use of welding procedures and deployment of qualified personnel on the shop floor. Conduct welding inspections and proactively identify maintenance or modification needs of welding machines. Take necessary responsibility for your work, quality, safety, and achieving goals.

What does SIF offer you?

A salary ranging from €3,415 to €5,166 gross per month (scale 9), . Good pension scheme. 25 vacation days and 13 ADV (reduction of working hours) days. Training and development opportunities. A friendly team and a pleasant working environment. A place where you can continue to grow and develop. Impact on the energy transition and sustainability of the Netherlands and Europe.

Your background:

A (minimum) completed technical vocational education (mbo-3). Experience in welding, (functional) leadership of welders, or supervision and training of welders. IWP or IWS is an advantage. A good command of the English and Dutch language, both spoken and written. Do you have a valid VCA-VOL diploma? If not, you can obtain it through Sif. Basic knowledge of computer programs such as Word, Excel, and Outlook.

Feel free to apply even if you don't have a 100% match with the vacancy! Even with a 60% match, you can become a specialist at Sif. Quality and safety at work are our top priorities. This means that you will start with a training program before you can work independently. During the training, you will alternate between theory and practice, and you will receive intensive guidance throughout the process.

Is this your new challenge?

Your energy is welcome at Sif! Interested? Apply directly via the application button. If you want more information about the vacancy or the application process, please contact John Barnhoorn at j.barnhoorn@sif-group.com.
